Hubli, Karnataka

[linkedin.com/in/toufiq-ahmed-akki](https://www.linkedin.com/in/toufiq-ahmed-akki)

Highly skilled and motivated full-stack developer seeking a challenging position to utilize my technical expertise and contribute to the success of an innovative organization.

SKILLS

Languages: Php, Python, HTML, CSS, Javascript

Framework and libraries: Laravel, React, Bootstrap, JQuery, TailwindCSS

Databases: MySQL, MariaDB, PostgreSQL, Clickhouse, Snowflake, MongoDB

Version management: Git, Github, Gitea

EXPERIENCE

Aissel Technologies, Hubli

Full Stack Web Developer | Member of Technical Staff

May 2022 - PRESENT

- **Application Development & Upgrades:** Enhanced and managed critical applications like Konectar, a KOLM platform, and Konectar2, ensuring seamless upgrades to Laravel and ReactJS while maintaining high coding standards, custom helper classes, and consistent API implementations.
- **Data Management & Visualization:** Worked on CloudSSCC and CloudMunk, platforms for beverage data management, using PostgreSQL and ClickHouse to handle large-scale datasets. I ensured robust analytics, visualization, and maintenance capabilities, meeting diverse client requirements.
- **Specialized Modules:** Designed and developed a Contracting Module from scratch, facilitating contract workflows for vendors, with features such as creation, review, approval, and signature processes, integrated with the Konectar platform.
- **Client Engagement:** Regularly interfaced with clients to gather requirements, deliver updates, and address requests, ensuring projects aligned with business needs.

Tata Consultancy Services, Bangalore - Remote

Abap Developer | System Engineer

Sept 2020 - May 2022

- **Change Requests & Enhancements:** Delivered high-quality solutions for change requests (CRs) and enhancements within the SAP FICO module, ensuring seamless functionality and compliance with client requirements.
- **Update Activities:** Served as the single point of contact for update activities, overseeing and coordinating end-to-end processes to ensure timely and error-free implementation.
- **Development Expertise:** Utilized ABAP, HTML, CSS, JavaScript, and the HANA database to develop and enhance SAP modules, providing tailored solutions that aligned with business needs.

DocketRun Tech Pvt Ltd, Hubli

Data Science Intern

Dec 2019 - Jun 2020

- Worked extensively with Python, GUI development, and AI, building models for plant disease detection and object classification. I gained hands-on experience with YOLO and TensorFlow, and developed a human detection and heatmap tracking system for CCTV feeds.

EDUCATION

Bachelors of Engineering - CSE

K.L.E. Institute of Technology, Hubli - Visvesvaraya Technological University

Aug 2016 - Aug 2020

PUC (12th) - Science

Dr R.B. Patil Mahesh P.U. College, Hubli - Department of Pre University Education

Aug 2014 - Jul 2016

PROJECT EXPERIENCE

Konectar → Laravel, Codeigniter, NextJS, Bootstrap, Mysql, Clickhouse, Git, Jenkins

- Managed and upgraded Konectar, a Key Opinion Leader Management (KOLM) platform supporting life sciences companies in identifying and engaging healthcare professionals.
- Led the transition to Konectar2, built on Laravel and ReactJS, by setting up the upgrade project and providing knowledge transfer (KT) sessions to onboard team members.
- Implemented core functionalities, including authorization, authentication, email services, and user logging, while maintaining API standards and custom helper classes for consistency.
- Enhanced modules such as User-Clients details, Heatmap, tags, and KOLs data, improving platform usability and data analytics capabilities.
- Ensured seamless integration and project alignment with business goals by maintaining high coding standards and collaboration across teams.

KOL Contracting Module → Laravel, blade, bootstrap, JQuery, Mysql

- Designed and developed a Contracting Module from scratch, focusing on streamlining contract creation, review, approval, and signature processes for vendors such as organizations, MSLs, HCPs, and other stakeholders.
- Established workflows and database structures to efficiently manage contracts linked to the Konectar platform, ensuring seamless integration and usability.
- Implemented features for contract lifecycle management, including notifications via email communication to keep parties informed throughout the process.
- Delivered a scalable and robust application that simplified the contracting experience for vendors while enhancing operational efficiency.

KonectChat → Laravel, NodeJS, Bootstrap, Mysql, socketIO

- Enhanced and managed KonectChat, an application providing a dynamic agent dashboard for real-time communication and user interaction.
- Improved functionalities such as agent-user chat, auto-responses for unattended queries, and user features like scheduling meetings, accessing information, raising complaints, and requesting demos.
- Optimized tools for agents to track user activity, analyze chat patterns, configure auto-responses, and receive notifications for user activities or requests.
- Streamlined performance and ensured reliability to enhance user engagement and agent productivity.
- Collaborated with cross-functional teams to implement improvements aligning with evolving business requirements.

IMAP Application - Otsuka Pharmaceutical → Laravel, Jquery, Bootstrap, Mysql, Snowflake

- Developed and maintained the IMAP application for Medical Science Liaisons (MSLs), enabling efficient identification and analysis of domain-specific influencers.
- Transitioned the application from CodeIgniter to Laravel for enhanced performance and maintainability.
- Implemented features like influencer count analysis, top influencer identification by state, and heatmap visualizations.
- Managed end-to-end database activities, including design, optimization, and monitoring.
- Oversaw server monitoring and troubleshooting to ensure high availability and reliability.

CloudSSCC and CloudMunk - Solve Technologies → Laravel, Rails, Bootstrap, postgresql, Clickhouse

- Collaborated with Solve Pvt Ltd, supporting beverage companies like Coca-Cola, Monster, BodyArmor, Delta, and Fairlife, to manage their outsourced application, CloudSSCC.
- Oversaw data processing for beverage bottles, including LPN, plant, pallet, and batch details, received via QR code scans through SFTP, API, and manual uploads.
- Maintained CloudMunk, a Laravel-based dashboard for CloudSSCC data, enabling configuration, analytics, visualization, and monitoring.
- Managed large-scale databases using PostgreSQL and ClickHouse to handle high-volume data requirements efficiently.
- Partnered with third-party vendors like Cyraacs to achieve penetration testing certification for CloudSSCC, adhering to OWASP protocols for enhanced security.
- Addressed change requests, configuration updates, and data maintenance while ensuring system reliability and client satisfaction.

Achievements

- Attended industry-leading events including:
 - **Laracon IN** 2025 by Laravel
 - **AI for Startups** 2024 by Google
- Recognized as the Top-Rated Developer in the current organization for 4 consecutive quarters
- HackerRank Certification in Python, Java, SQL
- LinkedIn-Learning Certification in ABAP for SAP, Java essential training, Php essential training.
